

baya

A The city **is which** is situated in the air. **They are also in** The architecture of the towers **has** the shape of flowers.

Big golden constructions are **reflected reflective** and absorb the electric power of the sunlight.

She It is more ecological because **she It** uses the electricity absorbed to run the city.

People don't use polluting cars and numerous trees allow the purification of the air.

People will prefer to live in our city because it is silent and without pollution ; **ans they are moreover there is** a magnificent view.
